SCI	HEDULING	
	STIP Fiscal Year	
	PS&E Date	
	Suggested Advertising Date	
	☐ New Structure ☐ Replacement ☐ Modification	
	On:	
	☐ Interstate Highway System ☐ State Highway System	
	☐ Scenic Highway System ☐ Local Road System	
	Additional data for pumping plant is:	
	☐ Not required ☐ Required and date	
1.	ACCESS	
	Legal access to site is available from	
	☐ Legal access not available. Office of Structure Design to check with District before field work.	
	☐ Access to the site is restricted by environmental consideration.	
	Contact	
	at phone number before any work is done at the site.	
2.	ALIGNMENT AND GRADE	
	Data attached includes:	
	Proposed alignment and ties to staked line or monuments	
	Lower roadway toe of slope grid grades	
	Grade line(s) which is (are) fixed	
	Grade line(s) which can be adjusted	_
	☐ Edge of deck grades (AC and PCC)	
	Superelevation Diagram	
	Office of Structure Design to expedite General Plan to District for final grade determination or	
	for	_
	Site Data Controls:	
	☐ Survey lines and/or construction centerline staked and visibly marked.	
٠.	Date of Survey	_
	Survey lines and/or construction centerline to be staked upon request.	
3.	APPROACHES	
	AC PCC pavement will be used on road approaches.	
	Full slope paving on approach fills recommended.	
	PS&E by: Office of Structure Design District	

4.	BENCH MARKS
	Bench marks and monuments in immediate vicinity of site shown on site plan, include location, description and elevation.
	☐ Vertical control datum is:
	☐ NGVD Date of Adjustment
	☐ District ☐ As-Built ☐ Assumed
5.	BRIDGE RAIL/GUARD RAIL
	☐ District recommends standard railing
	☐ District recommends Type as shown on enclosed drawings.
	Structure located on superelevation transition, possibly affecting rail profile. Office of Structure Design to comment
	Locations of metal beam guard railing shown on site data. Office of Structure Design to provide suitable connections at ends of bridge rail. Metal beam guard railing to be included in District PS&E.
	Median barrier railing on structure. Type is recommended.
	Glare screen required.
	See "Additional Data"
6.	CLEARANCES
	feet minimum horizontal clearance to column or abutment from right edge of pavernent and
	feet from left edge of pavement with respect to direction of traffic.
	Vertical clearance of feet required over initial and ultimate traveled ways, feet over
	shoulders (includes) feet additional clearance required under Pedestrian or Cyclist Overcrossing
	Vertical clearance controls per attached calculations. Structure depths used in establishing grades
	are listed below 🔲 and are in accordance with Office of Structure Design Advance Planning Study
	dated
	See "Hydraulic Data" for estimated peak High Water elevation.
	☐ Match existing
	Columns or pier permitted in the median.
	Railroad off-track Maintenance Road and/or future track requirements shown on Site Plan.
7.	COORDINATION
•	District to submit Bridge General Plan to local authorities for approval. District to notify Office of Structure Design before Office of Structure Design proceeds with structure design.
	District will request Department of Fish and Game approval upon receipt of necessary data from Office of Structure Design.
	Copies of pertinent correspondence from local authorities are attached (Reclamation Board, Flood Control Districts, etc.).

	IDGE SITE DATA SUBMITTAL Page 4 of 92-0048 (REV. 6/93)
8.	CORROSION CLASSIFICATION
	Site is not considered corrosive.
	☐ Site is considered corrosive. Corrosion test sheets are attached.
	Site is within 1,000 feet of ocean or tidal water.
	Data not available at this time. Will be furnished when available.
9.	DECK PROTECTION
	☐ The structure ☐ will ☐ will not be exposed to de-icing salts or chemicals.
	☐ The structure's riding surface ☐ will ☐ will not be exposed to chain use.
10.	DESIGN SPEED/SIGHT DISTANCE
	Design speeds shown on plans.
	Design speeds are: mph.
	Factors affecting sight distance: None See "Additional Data".
11.	DETOUR
	☐ None required.
	☐ Traffic to use existing facilities.
	☐ Traffic can be detoured.
	Required. Traffic to
	Stage construction required. See "Additional Data". (Include proposed traffic handling and Sequence of Operations).
	See "Falsework".
	Office of Structure Design to review and comment.
12.	DISPOSAL OF OLD BRIDGE
	☐ No restrictions.
	Removal can be accomplished after construction. PS&E by Office of Structure Design.
	☐ Existing structure to remain in place for traffic.
	☐ Traffic can be: ☐ detoured ☐ temporarily stopped.
	☐ Disposition of salvageable material to be handled by Office of Structure Design.
	☐ Protective cover over lower roadway needed. PS&E by Office of Structure Design.
13.	DRAINAGE
	District will provide shoulder drains on approaches near high end(s) of structure to prevent drainage crossing end(s) of structure.
	Accumulated surface water to be carried on structure across freeway. Special sealing at structure ends and seat type abutments to be provided by Office of Structure Design. (This may be expensive. Should be discussed by District and Structure designer).

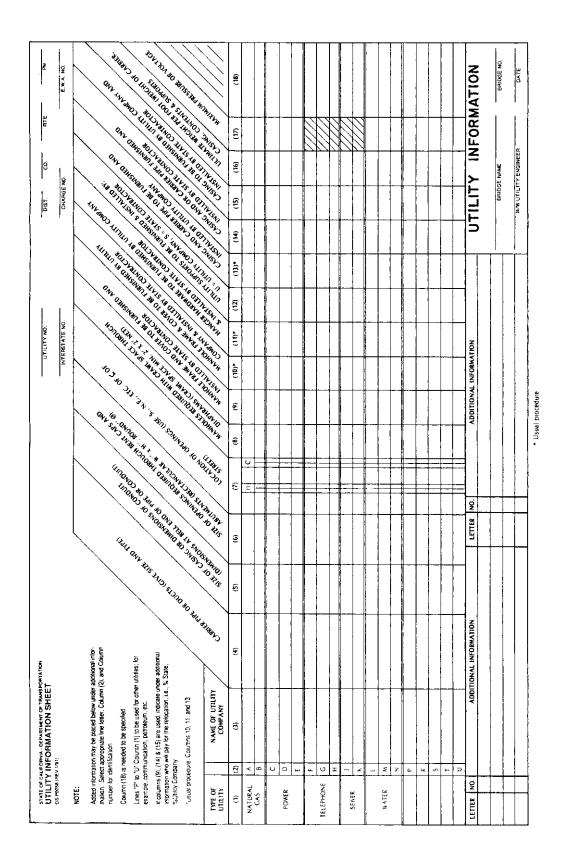

4.	ENVIRONMENTAL IMPACT REPORT		•	
	☐ Attached			
	☐ Not applicable			
5.	FALSEWORK			
	☐ No restrictions. No traffic.			
	 Falsework not allowed over traffic. State construction attached plans. 	required a	s detailed under	"Additional Data" and
	☐ Falsework openings to have:			
	☐ Type K temporary railings adjacent to traffic			
	☐ Crash Cushions adjacent to end of railings.			
	Grades are set to provide minimum falsework depths	per High	way Design Man	ual.
	Provide opening(s) in falsework: wide located	·-	_	
	Covered pedestrian passageways to be win	de by	high,	
	Falsework lighting is (not) required.			
			to	and
	☐ Traffic is not to be interrupted between the hours of _			
	Traffic is not to be interrupted between the hours of on weekdays and no	ot at all or	n Saturdays, Sur	ndays and Holidays.
	☐ Traffic is not to be interrupted between the hours of on weekdays and not on weekdays and not on the time only for e	ot at all or rection of	n Saturdays, Sur prefabricated gi	ndays and Holidays. rders, erection or remo
	Traffic is not to be interrupted between the hours of on weekdays and no	ot at all or rection of re or	n Saturdays, Sur prefabricated gir	ndays and Holidays. rders, erection or remo

	☐ District proposes feet minimum clearance above ☐ Q 50 ☐ Q 100 peak h	ighwater
	elevation offeet. Division of Structures to verify.	
	Proposed structure drainage design to be included with Structures General Plan for Distriction with roadway drainage.	ict's
	See "Additional Data".	
8.	LOADING	
	Structure on "SHELL" Route.	
	structure to carry construction overloads.	
	☐ No special construction loading.	
9.	OBSTRUCTIONS	
	☐ None existing other than those stated under Utility requirements.	
	☐ Traffic ☐ Existing bridge ☐ Water flow	
	Overhead wires Buried utilities	
	Listed below are those obstruction that are to remain in place or will be moved to location	s where
	they could interfere with design or construction:	
	they could interfere with design or construction:	
0.		
0.		
0.	RETAINING WALLS (By District except for special designs).	
0.	RETAINING WALLS (By District except for special designs). None required.	
0.	RETAINING WALLS (By District except for special designs). None required. Shown on District site plan. Special design required.	
0.	RETAINING WALLS (By District except for special designs). None required. Shown on District site plan.	
	RETAINING WALLS (By District except for special designs). None required. Shown on District site plan. Special design required. PS&E by: Office of Structure Design District	
	RETAINING WALLS (By District except for special designs). None required. Shown on District site plan. Special design required. PS&E by: Office of Structure Design District See "Additional Data".	
	RETAINING WALLS (By District except for special designs). None required. Shown on District site plan. Special design required. PS&E by: Office of Structure Design District See "Additional Data". SIDEWALK ON STRUCTURE None required.	
	RETAINING WALLS (By District except for special designs). None required. Shown on District site plan. Special design required. PS&E by: Office of Structure Design District See "Additional Data".	
	RETAINING WALLS (By District except for special designs). None required. Shown on District site plan. Special design required. PS&E by: Office of Structure Design District See "Additional Data". SIDEWALK ON STRUCTURE None required. Sidewalk(s) required as indicated.	
	RETAINING WALLS (By District except for special designs). None required. Shown on District site plan. Special design required. PS&E by: Office of Structure Design District See "Additional Data". SIDEWALK ON STRUCTURE None required. Sidewalk(s) required as indicated. Sidewalk(s) required to connect to existing system of sidewalks. Subdivision activities in the immediate area indicate that construction of a connecting system of side	lewalks

22.	STORAGE FACILITIES
	☐ No restrictions ☐ Restricted
	Due to physical restrictions and hazards to traffic in the immediate vicinity of the bridge construction site on-site storage of fabricated girders is not available.
	☐ Fabrication of girders or storage of material should not be allowed within feet of edge of
	shoulder of freeway or feet of other roads.
23.	STRIP MAP
	Attached.
	Previously submitted with letter of
24.	STRUCTURE TYPE RECOMMENDATIONS
	None. Division of Structures to recommend type. Aesthetic considerations to be consistent with neighboring structures.
	Type selection to accommodate anticipated future widening.
	Closed end.
	Open end type with ; end slopes starting feet minimum from edge of pavement.
	See "Additional Date" for unusual or special aesthetic considerations.
25.	UTILITY REQUIREMENTS
	All existing utilities shown on District Site Plan.
	All existing utilities in conflict with the structure except as listed below will be removed or relocated
	by District \square prior to, \square concurrent with construction.
	Existing utilities that are to remain are:
	These utilities ☐ are ☐ will be tied to survey construction lines, ☐ will be staked by
	District shortly before structure foundation work (excavation, pile driving or drilling).
	No utilities to be carried on structure.
	Information on utilities to be carried on structure,
	☐ Complete Utility Information Sheet DS-P58 ☐ attached ☐ will be forwarded at a later date
	☐ Complete Utility Information Sheet DS-P58 ☐ attached ☐ will be forwarded at a later date ☐ listed below.
	 □ Complete Utility Information Sheet DS-P58 □ attached □ will be forwarded at a later date □ listed below. □ Highway operational utilities in structure, i.e. lighting traffic signals, etc.

1.	ACCESS
	() Legal access to site is available from
	() Legal access if available from both sides of sound wall.
	() Legal access not available. Office of Structure Design to check with District before field work.
	() Access to the site is restricted by environmental consideration. Contactat phone number before any work is done at the site.
2.	ALINEMENT AND GRADE
	Data attached includes:
	() Proposed alinement and ties () Lower roadway toe of to staked line or monuments. slope grid grades.
	() Grade line(s) which is (are) fixed Grade line(s) which can be adjusted
	() Superelevation Diagram.
	Site Data Controls:
	() Survey lines and/or construction centerline staked and visibly marked. Date of Survey
	() Survey lines and/or construction centerline to be staked upon request.

3	3.	BENCH MARKS
		() Bench marks and monuments in immediate vicinity of site shown on site plan, include location, description and elevation.
		() Vertical control datum is () NGVD date of adjustment () District () As-Built () Assumed.
4	4.	BARRIER TYPE RECOMMENDATIONS (Sound wall on barrier)
		() District recommends Type Barrier.
		() Shown on enclosed drawings.
5	5.	CHECKED DATA:
		Data which has been checked:
		() Alinements and Traverses
		() Grade Lines and Superelevations
ϵ	5.	APPROVED HORIZONTAL CLEARANCE
		()ft. minimum horizontal clearance from edge of roadway to sound wall.
7	7.	COORDINATION
		() District to submit "Sound Wall General Plan" to local authorities for approval. District to notify Office of Structure Design before Office of Structure Design proceeds with structure design.
		() Copies of pertinent correspondence from local authorities are attached (Rec. Board, Flood Control Districts, etc.).
8	3.	CORROSION CLASSIFICATION
		() Site is not considered corrosive.
		() Site is considered corrosive. Corrosion test sheets are attached.
		() Site is within 1,000 feet of ocean or tidal water.
		() Data not available at this time. Will be furnished when available.
		3

9.	DETOUR
	() None required.
	() Traffic to use existing facilities.
	() Required. Traffic to
	() Stage construction required. See "Additional Data". (Include proposed traffic handling and Sequence of Operations).
	() Office of Structure Design to review and comment.
10.	ENVIRONMENTAL IMPACT REPORT (Portions affecting sound walls)
	() Attached.
	() Not applicable.
11.	TEMPORARY RAILING
	() None required. Traffic will be out of construction area.
	() Temporary railing(s) will be required during detour or stage construction phases.
12.	GUARD RAILING
	() Approach guard railing is recommended. PS&E by Office of Structure Design.
	() Locations of metal beam guard railing shown on site data. Office of Structure Design to provide suitable connections at ends of barrier. Metal beam guard railing to be included in District's PS&E.
13.	OBSTRUCTIONS
	() None existing other than those stated under Utility requirements.
	() Traffic
	() Listed below are those obstruction that are to remain in place or will be moved to locations where they could interfere with design or construction.
	4

14.	RETAINING WALLS (Sound wall on retaining wall is a special design)
	() None required.
	() Shown on District site plan.
	() Special design required.
	() PS&E by () Office of Structure Design. () District.
	() See "Additional Data".
15.	STORAGE FACILITIES
	() No restrictions. () Restricted.
	() Due to physical restrictions and hazards to traffic in the immediate vicinity of the sound wall construction site, on-site storage of prefabricated sound walls is not available.
	() Fabrication of precast sound walls not permitted in R/W .
	() Fabrication of sound walls or storage of material should not be allowed within ft of edge of shoulder of freeway or ft of other roads.
16.	SOUND WALL TYPE RECOMMENDATIONS
	 () None. Office of Structure Design to recommend type. Aesthetic considerations to be consistent with neighboring structures.
	() Concrete Masonry Block
	() Precast Concrete Panels
	() Cast-in-place concrete
	() Metal
	() Wood
	() Other
17.	TEMPERATURE RANGE
	Approximate air temperature range from a low of°F to a high of°F.
	5

18.	UTILITY REQUIREMENTS
	() All existing utilities shown on District Site Plan.
	 () All existing utilities in conflict with the sound wall except as listed below will be removed or relocated by District () prior to, () concurrent with construction.
	() Existing utilities that are to remain are:
	These utilities () are () will be tied to survey construction lines, () will be staked by District shortly before structure foundation work (excavation, pile driving or drilling).

3.	BENCH MARKS
	 Bench marks and monuments in immediate vicinity of site shown on site plan, include location, description and elevation.
	() Vertical control datum is () NGVD date of adjustment () District () As-Built () Assumed.
4.	BARRIER TYPE RECOMMENDATIONS (Sound wall on barrier)
	() District recommends Type Barrier.
	() Shown on enclosed drawings.
5.	CHECKED DATA:
	Data which has been checked:
	() Alinements and Traverses
	() Grade Lines and Superelevations
6.	APPROVED HORIZONTAL CLEARANCE
	()ft. minimum horizontal clearance from edge of roadway to sound wall.
7.	COORDINATION
	() District to submit "Sound Wall General Plan" to local authorities for approval. District to notify Office of Structure Design before Office of Structure Design proceeds with structure design.
	() Copies of pertinent correspondence from local authorities are attached (Rec. Board, Flood Control Districts, etc.).
8.	CORROSION CLASSIFICATION
	() Site is not considered corrosive.
	 () Site is considered corrosive. Corrosion test sheets are attached.
	() Site is within 1,000 feet of ocean or tidal water.
	() Data not available at this time. Will be furnished when available.
	3

9.	DETOUR
	() None required.
	() Traffic to use existing facilities.
	() Required. Traffic to
	() Stage construction required. See "Additional Data". (Include proposed traffic handling and Sequence of Operations).
	() Office of Structure Design to review and comment.
10.	ENVIRONMENTAL IMPACT REPORT (Portions affecting sound walls
	() Attached.
	() Not applicable.
11.	TEMPORARY RAILING
	() None required. Traffic will be out of construction area
	() Temporary railing(s) will be required during detour or stage construction phases.
12.	GUARD RAILING
	() Approach guard railing is recommended. PS&E by Office of Structure Design.
	() Locations of metal beam guard railing shown on site data Office of Structure Design to provide suitable connections at ends of barrier. Metal beam guard railing to be included in District's PS&E.
13.	OBSTRUCTIONS
	() None existing other than those stated under Utility requirements.
	() Traffic
	 Listed below are those obstruction that are to remain in place or will be moved to locations where they could interfere with design or construction.
	4

14.	RETAINING WALLS (Sound wall on retaining wall is a special design)
	() None required.
	() Shown on District site plan.
	() Special design required.
	() PS&E by () Office of Structure Design. () District.
	() See "Additional Data".
15.	STORAGE FACILITIES
	() No restrictions. () Restricted.
	() Due to physical restrictions and hazards to traffic in the immediate vicinity of the sound wall construction site, on-site storage of prefabricated sound walls is not available.
	() Fabrication of precast sound walls not permitted in R/W .
	() Fabrication of sound walls or storage of material should not be allowed within ft of edge of shoulder of freeway or ft of other roads.
16.	SOUND WALL TYPE RECOMMENDATIONS
	 () None. Office of Structure Design to recommend type. Aesthetic considerations to be consistent with neighboring structures.
	() Concrete Masonry Block
	() Precast Concrete Panels
	() Cast-in-place concrete
	() Metal
	() Wood
•	() Other
17.	TEMPERATURE RANGE
	Approximate air temperature range from a low of°F to a high of°F.
	5

18.	UTI	LITY REQUIREMENTS
	()	All existing utilities shown on District Site Plan.
	()	All existing utilities in conflict with the sound wall except as listed below will be removed or relocated by District () prior to, () concurrent with construction.
	()	Existing utilities that are to remain are:
		These utilities () are () will be tied to survey construction lines, () will be staked by District short before structure foundation work (excavation, pile drive or drilling).
